Remeet: Enhancing Organization, Elevating Productivity

In today's fast-paced world, time management and ensuring security are the keys to organizational success. Research by Gallup shows that organizations that manage time wisely and prioritize physical and digital security achieve higher productivity. Remeet, an advanced solution for meeting room booking and management, combines cutting-edge technology with multi-layered security to deliver a fast, reliable, and professional experience for your organization.

Remeet combines modern design with advanced functionality to offer an all-in-one solution for meeting room reservations and door lock management. It helps reduce wasted time, streamline workplace organization, and elevate team collaboration with features like automatic meeting reminders, in-meeting chat, and reporting tools.

Imagine a modern office where, without the need for keys to unlock doors or phone calls to coordinate meetings, you can reserve and manage your meeting rooms with just a few simple clicks on a mobile app or website. This not only makes access easier but also enhances security and productivity within organizations.

Remeet is designed to create a modern experience by integrating technology into the workplace, taking a step towards building efficient and enjoyable environments for forward-thinking organizations.

Innovation in Workplace Management

Integration: Imagine a busy and complex world where you no longer need multiple apps or calendars to reserve meeting rooms, schedule sessions, or manage access to workspaces. Everything you need is available in one comprehensive platform.

Security: Control access to spaces precisely, based on each user's specific needs. The movement of meeting participants is logged using QR Code, and you can set a unique password for each device. Additionally, even without access to the software, doors can be unlocked simply by entering the password on the device.

Availability: Manage and reserve your spaces and meeting rooms anytime, anywhere using Android, iOS, and web-based applications.

Multi-Language & Time Zone Support: Remeet supports six major languages, including Persian, English, German, Arabic, Turkish, and French. It also enables seamless scheduling across different time zones, allowing you to coordinate meetings and events accurately without worrying about time differences.

Cloud and On-Permise Server: Organizations can store their data either on internal servers for greater control or in the cloud for easier access, depending on their needs. This flexibility ensures secure and efficient information management.

Challenges and Solutions

Challenge One: In most companies, people use different tools such as phone calls and various messaging apps to schedule their meetings. This often leads to problems such as wasted time coordinating meetings, disorganization, forgotten appointments, and reduced productivity.

Solution: People can use a single tool to plan and coordinate their meetings, accessible anytime and anywhere. With it, they can invite teammates to meetings, track their attendance status, and set reminders for them.

Challenge Two: Access to rooms that store various documents and equipment often requires high-level security.

Solution: With Remeet, you can set different access levels for individuals within the organization. This feature not only enhances security but also provides the ability to manage and control spaces and rooms.

Challenge Three: In workspaces, each room has its own unique name, often displayed on a signboard, and changing them is a costly and time-consuming process.

Solution: With just a few clicks, individuals can easily change the details of their room in a way that is visible to everyone.

Zones

Sometimes, planning and coordinating meetings in the workplace becomes a major challenge. Lack of access to suitable rooms or insufficient information about available time slots can lead to wasted time and reduced team productivity. Additionally, coordinating with colleagues to find the right space and schedule meetings verbally or on paper is often time-consuming.

With Remeet, you can easily overcome these challenges as it allows you to easily book meetings in any available space. Additionally, you can invite your colleagues to meetings and set personalized reminders to ensure no meeting is missed. This system not only boosts productivity but also helps create an organized and professional work environment, enabling you to make the best use of your time and resources.

Additionally, spaces allow you to categorize different devices and assign any number of devices to the desired space.

Experience

Conference Room

The conference room is one of the most important areas of any workplace, playing a key role in meetings, team presentations, and decision-making. This space is typically designed for collaboration, discussion, and problem-solving, which makes efficient management and optimized use of it crucial. With Remeet, innovative features have been introduced to enhance the performance of conference rooms, bringing a professional and modern experience to users.

With Remeet, you can easily reserve meetings and have a clear schedule for room usage. You can also view the remaining time until the room is available and access detailed information about ongoing meetings, including the meeting title and the names of attendees. This information greatly aids in improving coordination and preventing scheduling conflicts.

Another feature of Remeet is the display of the company logo and room name on the connected device, which enhances the professional feel. Additionally, the ability to unlock the room door remotely via the mobile app or website provides added convenience for users. To personalize the user experience, it is also possible to set custom messages on the device. These messages can include a welcome greeting for users or information related to the meeting.

Workspace

A workspace should be designed not only to foster focus and productivity but also to enable collaboration and constructive interaction among team members. Efficient management of workspaces can help increase organization and reduce time wastage for the entire team. In Remeet, various features are available for managing workspaces. One of these features is displaying the list of attendees in the room.

Additionally, the system displays the current date and time, along with company-related information such as the company name and logo on the device connected to the room. This enhances the corporate identity and fosters a sense of belonging among employees in the workplace.

Another feature of the workspace device is the ability to unlock the room door remotely via the mobile app or website, allowing you to easily and securely access the room without the need for a key. To personalize the user experience, it is also possible to set custom messages on the device. These messages can include welcome greetings, important reminders, or motivational messages that help boost employee morale.

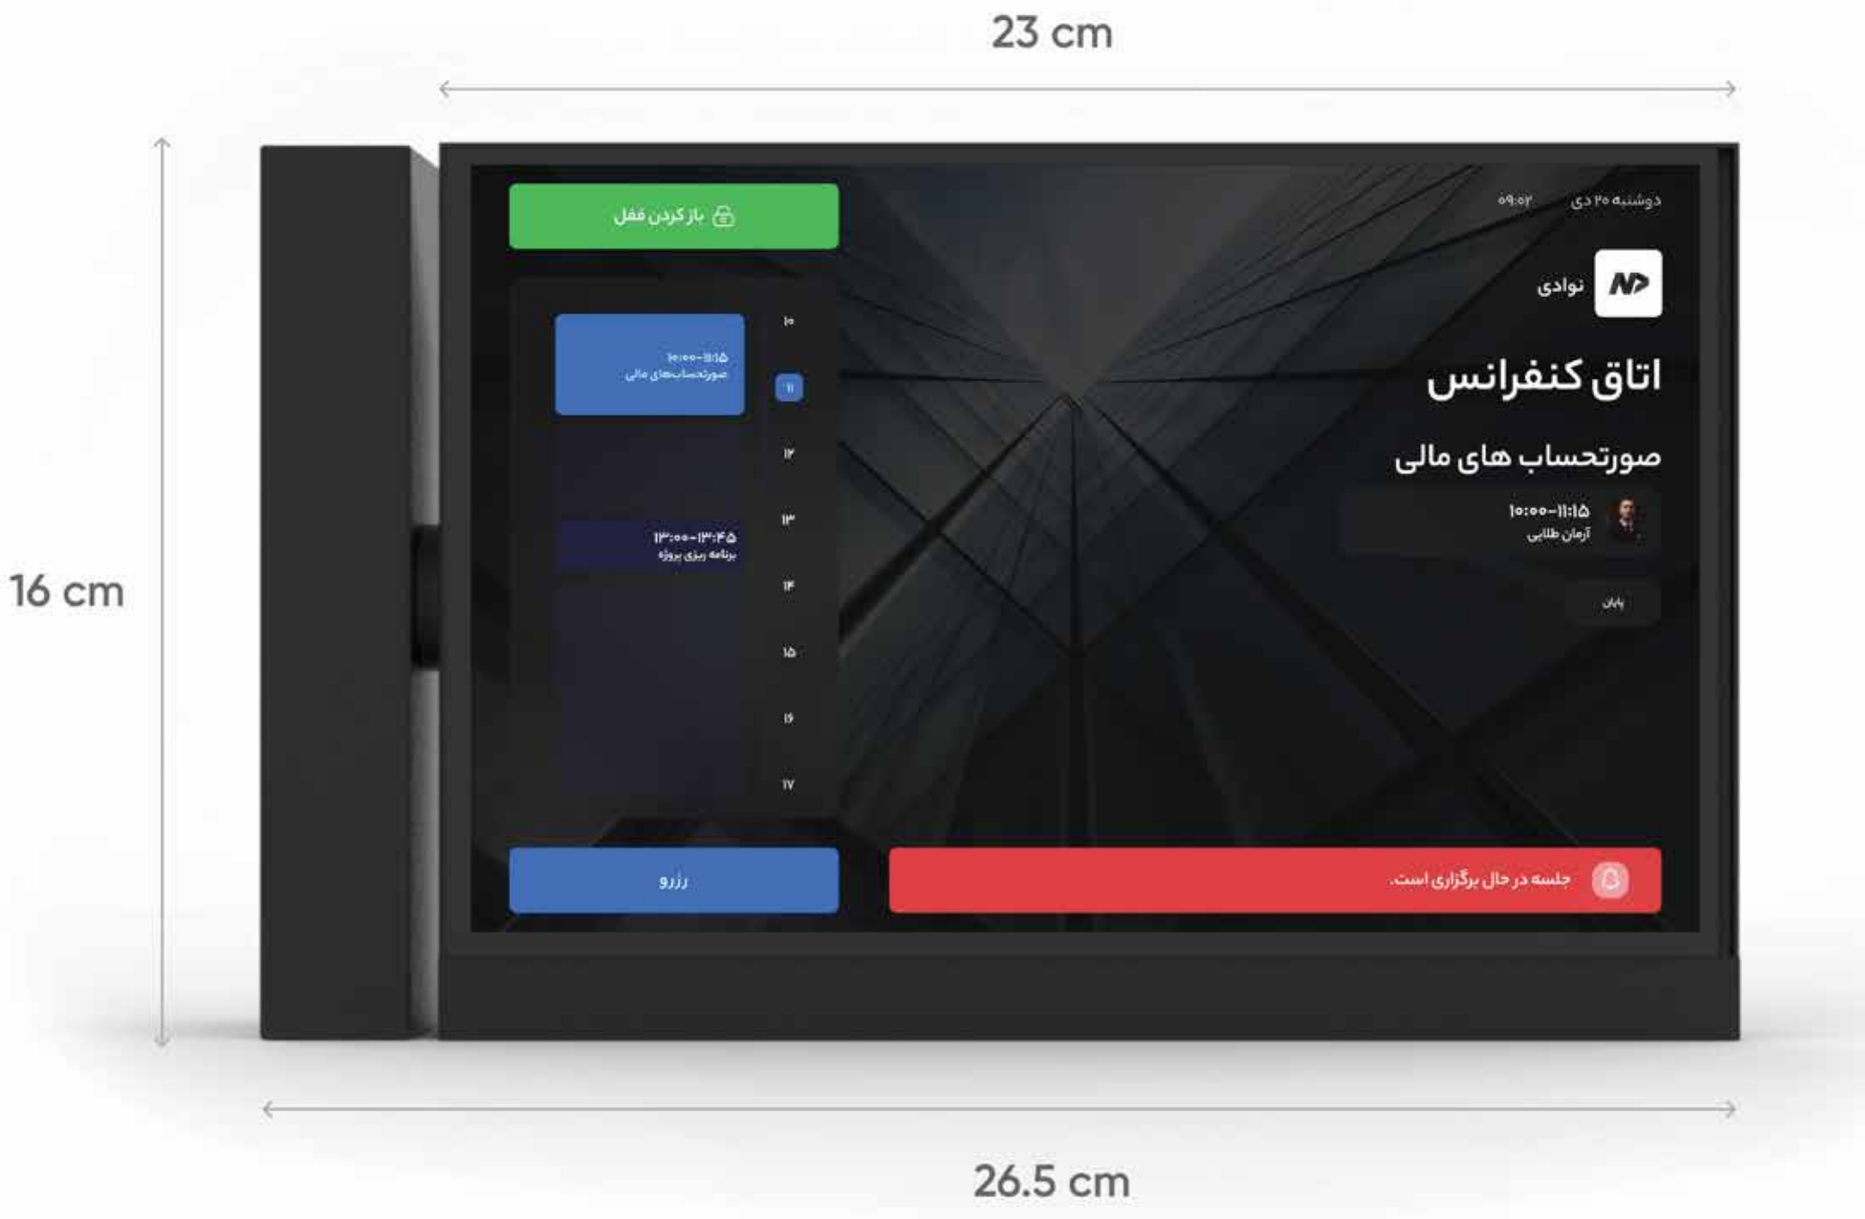

Hardware Features

Remeet is designed with a minimalist and sleek aesthetic while maintaining high functionality, providing a unique user experience in both form and performance. With dimensions of 26.5×16×7 cm, it is compact enough to be seamlessly integrated into various workspaces, including office environments. Its 10.1-inch display ensures optimal visibility of essential information.

The device's body is made of high-quality aluminum, offering both durability and a modern, professional appearance. It is available in three primary colors—black, silver, and white—with the option for custom colors to match different interior designs. The engineered design also allows users to adjust the angle up to 30 degrees, ensuring flexibility based on installation conditions.

One of its standout features is the concealed wiring system, ensuring a clean and organized look after installation. This makes it an ideal choice for minimalist environments where aesthetics are just as important as functionality. Attention to detail in the design reflects a commitment to delivering a product that meets not only performance needs but also aesthetic expectations, making it a perfect fit for modern, forward-thinking companies.

Software Features

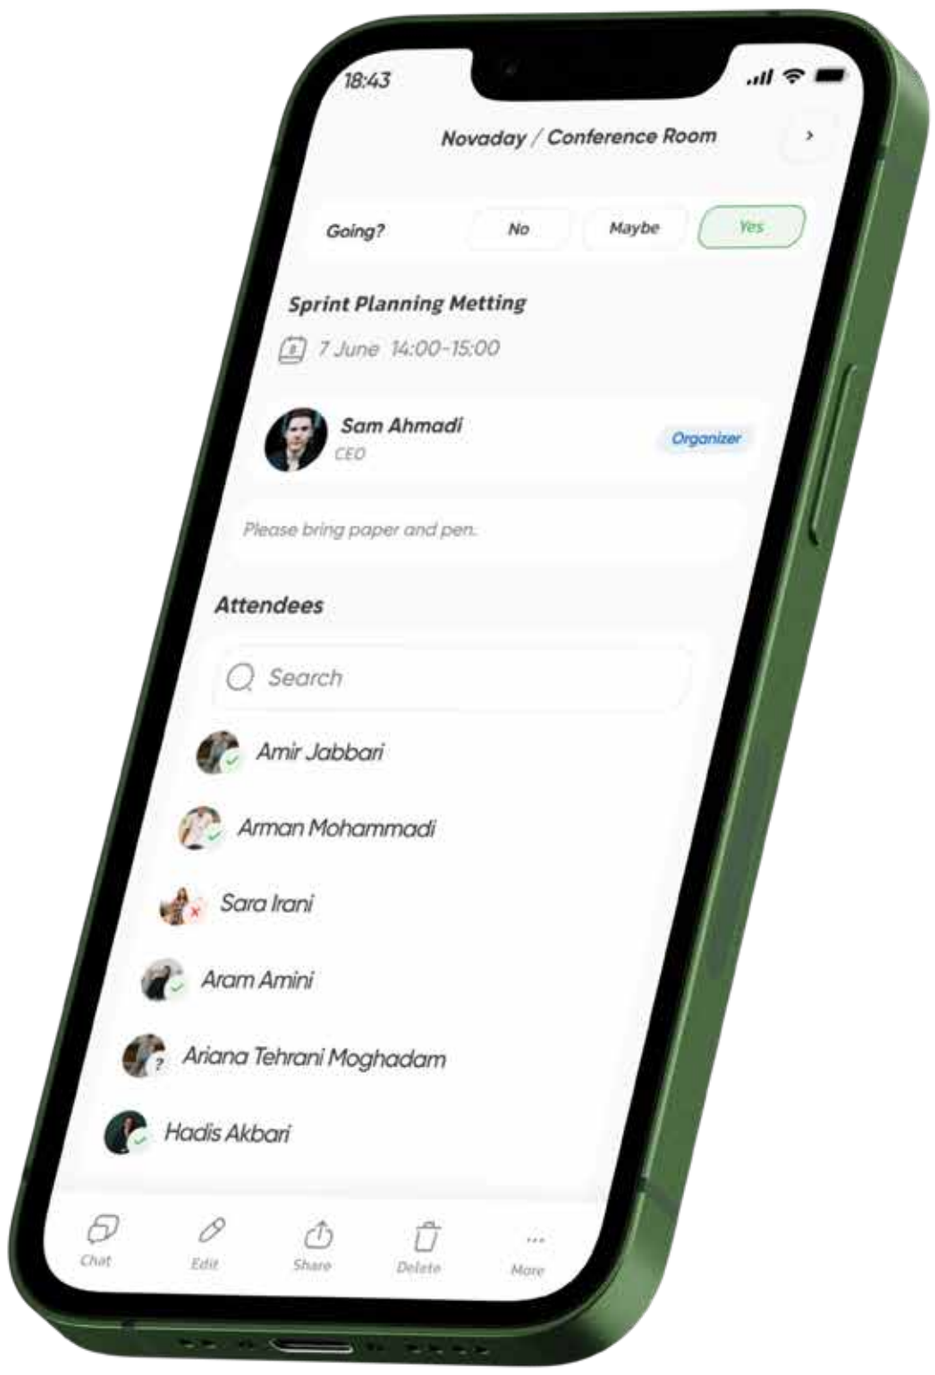

Company, branch, or business unit: Remeet enables organizations to manage multiple companies, branches, or business units simultaneously in an integrated environment. Users can also be added through invitations, and access levels can be configured. This feature helps businesses with multiple legal entities or regional offices.

Calendar: Various calendar types, including "personal, room, and colleagues," along with meeting notifications, are available. You can invite guests to meetings and track their attendance status. Additionally, the ability to unlock doors with QR code scanning is also supported.

System: Remeet supports both Solar and Gregorian calendars, enabling users to view meetings with search and filter options. Private and group chats are easily possible, and users can set their preferred time zone. Meeting times and device information are displayed based on the selected time zone.

Meetings: Remeet enables reservation of various meeting types, including confidential, recurring, one-on-one, and group sessions. Room capacity can be defined, and the software automatically warns if the participant count exceeds the limit. Meetings can be reserved with user authentication for better security.

Infrastructure & Requirements

Hardware: For device installation, it should be possible to mount it on a partition or wall. Access to electricity at the installation site is essential. For internet usage, a stable Wi-Fi signal or a connection via LAN cable should be available. The device should be installed in a location away from direct sunlight and hot, humid environments to ensure optimal performance.

Software: In Remeet, both cloud and dedicated server options are available. For the cloud server, it is sufficient for the device to be connected to the internet via Wi-Fi or LAN cable. Additionally, if needed, Remeet can also be installed and set up on your dedicated server.

Leading Employers, Outstanding Results

At the Remeet product team, we are proud to have worked with a range of leading employers across various industries, helping them improve performance and enhance efficiency through innovative solutions. These collaborations have enabled major and influential brands to leverage the capabilities of our product. Among our employers are Farazin Tehran, Avrand Pishro (Riseco Holding), Jabama, Abnoos Gasht (FlyToday), Donyaye Mes, Vana, Zibaloon, AI 24, Dorin Ris Semnan, Farayandsazan Petro Palayesh, Sarmaye Gozari Sandoq Bazneshastegi, Fanap Zirsakht, Azma Tashkhis Shahriar, Mania, and Alef Kimia. By utilizing our solutions, these brands have been able to optimize their processes and achieve outstanding results. Our collaboration with these clients is a testament to the quality and efficiency of our products, aimed at improving productivity and sustainable development within organizations.

Farazin Tehran

As one of the leading companies in the design and production of partitions and office furniture, Farazin has always been committed to creating modern and user-friendly workspaces. In line with this goal, Farazin decided to leverage innovative devices and software to enhance productivity and the work experience within its environments. Therefore, it chose Remeet software and devices to manage rooms and access control.

Need: The company needed a centralized and precise system for managing access levels, meeting reservations, and organization.

Challenge: The extensive organizational structure of Farazin's offices, including departments such as production, planning, and sales, created challenges for implementing Remeet. The presence of interconnected spaces and numerous rooms added complexity to the system’s design and deployment.

Result: Remeet, by providing an integrated solution for managing meetings, categorizing spaces, devices, and access levels, successfully met the needs of Farazin’s offices and departments. Ultimately, Access led to enhanced security, improved productivity, and easier space management.

فرآذین تهران

Riseco Holding (Avrand Pishro)

Avrand Pishro, a leader in automotive polymer parts manufacturing and the development of innovative technologies, has consistently sought to adopt modern tools to enhance efficiency and productivity within its organization. With a vision centered on innovation, the group initiated its collaboration with the Remeet team.

Need: Given the extensive operations of Avrand Pishro and the dispersion of its production and administrative units, there was a need for a comprehensive and intelligent system to manage access and organize meetings. The company's priorities included enhancing security and reducing time waste in daily processes.

Challenge: The large industrial space, the diversity of units, and the need to meet strict security requirements posed challenges for the implementation of Remeet.

Result: With the installation and implementation of the Remeet, Avrand Pishro was able to centrally manage access processes and meeting arrangements across all units. This solution enhanced security and optimized time management in daily operations, such as meetings.

R SE FOR TOMORR

Abnoos Gasht (FlyToday)

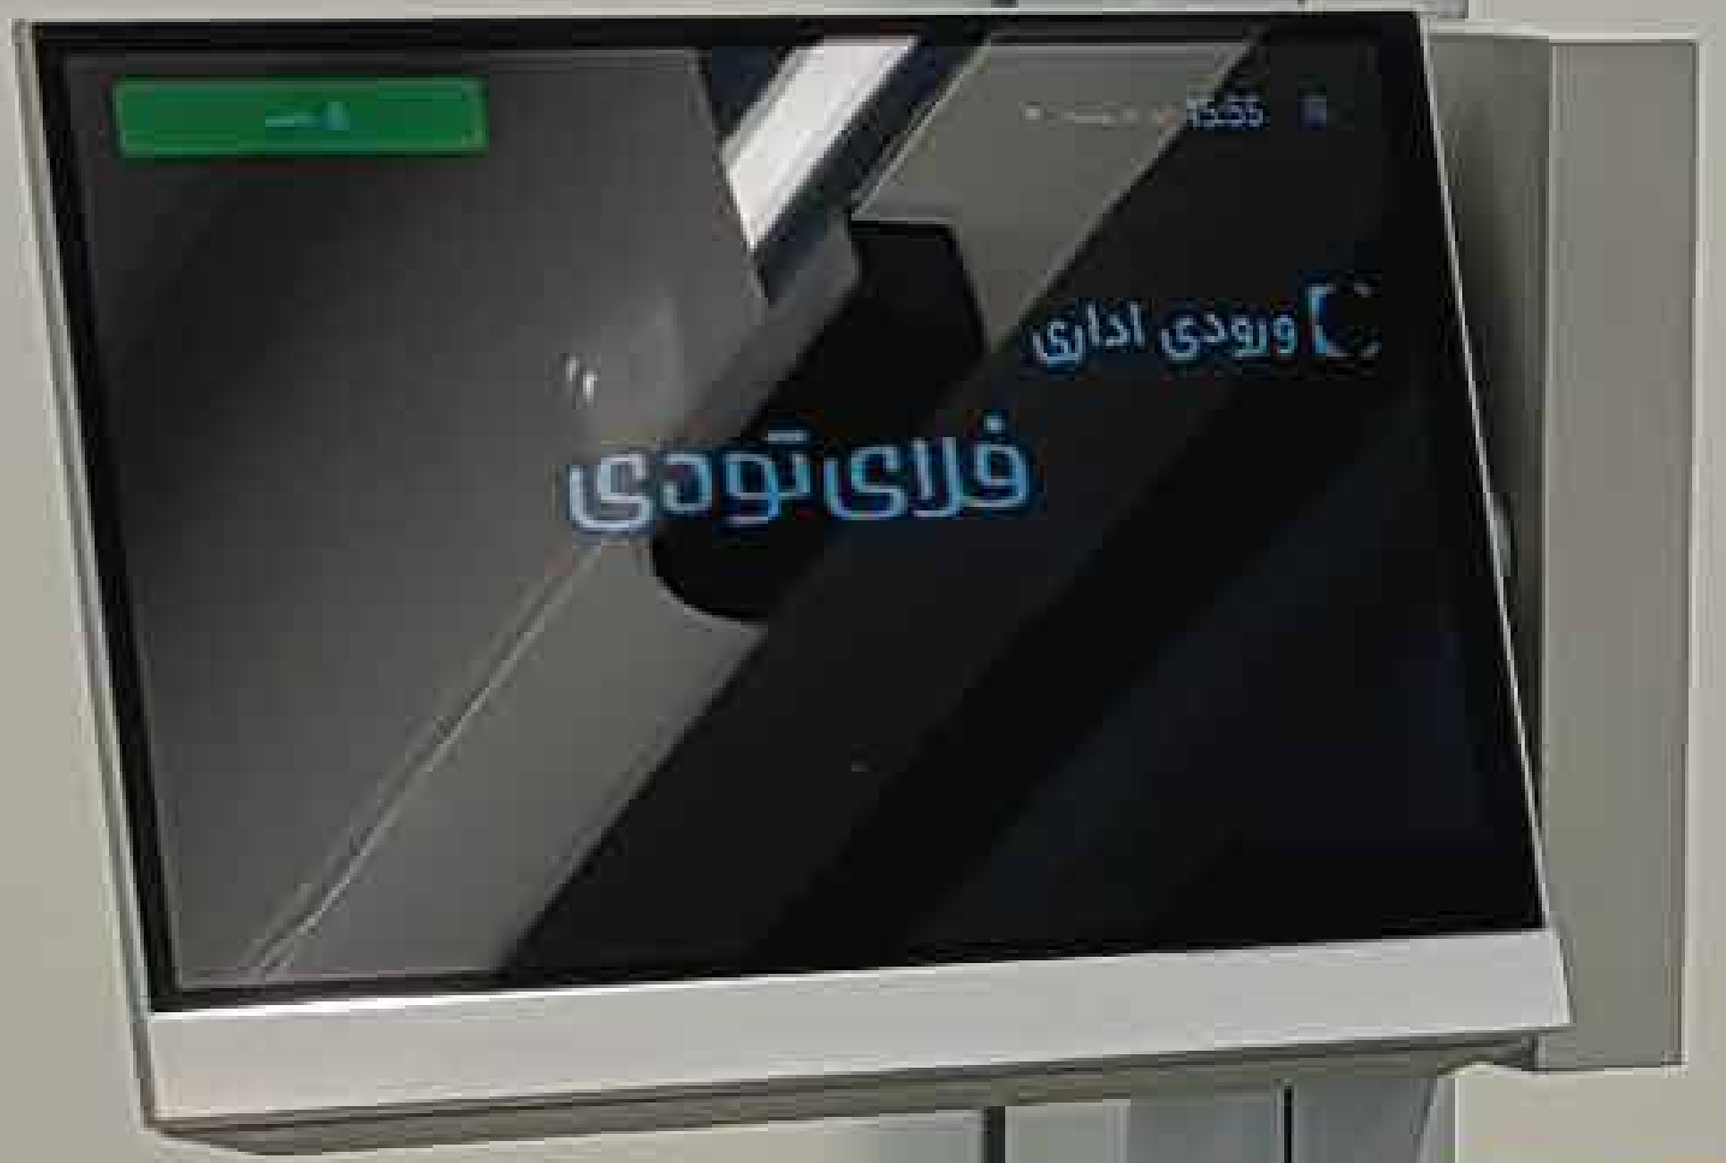

On Shariati Street, the Megapars Tower, one of the most prominent commercial and office centers in Tehran, provides an ideal environment for organizational activities with its modern design and advanced facilities. Within this space, FlyToday, a leader in the online travel industry, has always strived to create a world-class experience for travelers through innovative platforms and services. In line with its values and with the aim of creating a safe and efficient environment for its team, the company began collaborating with the Remeet team.

Need: The company required an intelligent and comprehensive system for managing access and controlling door locks smartly. The primary goal was to enhance security and reduce complexity in daily management.

Challenge: The modern design of FlyToday's offices, including open and private spaces and various rooms, required adherence to security standards, posing challenges in implementing the system.

Result: The installation and implementation of Remeet in FlyToday's offices enabled smart access management and remote door unlocking through the mobile app and website. This solution, while enhancing security, improved efficiency and created a more productive and cohesive environment for the Flytoday team.

Jabama

One of the most reputable accommodation booking and rental systems in Iran, with the goal of providing a unique travel experience, meets travelers' needs with accurate information, high variety, and extensive accessibility. However, such an organization, with a wide operational scope, needed innovative solutions for managing meetings and enhancing efficiency. In this regard, Jabama began its collaboration with the Remeet team.

Need: Given the design of Jabama's new office, which includes a variety of meeting rooms, the company needed a comprehensive and intelligent system that would enable optimal management of these spaces and facilitate the meeting scheduling process.

Challenge: Jabama's office, due to its modern decor design and the use of new partitions with unique designs, required a system that could be compatible with this distinctive structure.

Result: By implementing the Remeet system, the meeting management process at Jabama's offices improved. The system, while providing detailed reports, reduced complexities and created an efficient space for the Jabama team.

Donyaye Mes Kashan

Donyaye Mes Kashan, with over 20 years of experience, is a leading copper wire manufacturer in Iran and the region. The company leverages specialized human resources, advanced technologies, and global standards, playing a key role in supplying raw materials for various industries. As its operations grew, the company sought modern solutions to optimize internal processes, collaborating with Remeet.

Need: With office space expansion and new infrastructure for meetings, Donyaye Mes Kashan required an integrated system to enhance meeting space management, coordination, and productivity.

Challenge: Due to the large scale of its departments (production, R&D, quality control, and management), coordinating between teams and efficiently utilizing meeting spaces became challenging. There was also a need for a system that offered detailed reports, easy reservation options, and smart access control for managers.

Result: Implementing Remeet at Donyaye Mes Kashan improved meeting planning and execution. With features like automatic reservations, calendar integration, and detailed reporting, the system boosted productivity and enhanced interdepartmental coordination.
